

Bug Report — Swag Labs (https://www.saucedemo.com)

Tester: Dominic Syd V. Aldas
Environment: Brave / Windows 11
Date tested: October 6, 2026

Summary

ID	Title	User	Severity	Priority
BUG-01	Checkout allowed with an empty cart	standard_user	Major	High
BUG-02	Last Name input is typed into First Name field, blocking checkout	problem_user	Critical	High
BUG-03	"Reset App State" clears the cart but buttons still show "Remove"	standard_user	Minor	Medium
BUG-04	Checkout accepts invalid data (letters in postal code, digits/symbols/whitespace as names)	standard_user	Major	Medium
BUG-05	Add to cart / Remove buttons do nothing for specific products	problem_user	Critical	High
BUG-06	Cart contents persist across logout and across different user accounts	all	Major	Medium
BUG-07	Product images and detail pages don't match the product clicked	problem_user	Major	Medium
BUG-08	Sorting dropdown has no effect	problem_user	Major	Medium
BUG-09	Login with <code>performance_glitch_user</code> freezes with no loading feedback	performance_glitch_user	Minor	Low
BUG-10	Invalid product ID shows a broken/empty product page	any	Minor	Low

BUG-01 — Checkout allowed with an empty cart

- **Severity:** Major | **Priority:** High
- **User:** standard_user
- **Steps:**
 1. Log in as `standard_user`. Make sure cart is empty (badge not shown).
 2. Click the cart icon.
 3. Click **Checkout**.
 4. Enter First Name, Last Name, Postal Code → Continue → Finish.
- **Expected:** Checkout is blocked (button disabled or message "Your cart is empty").
- **Actual:** Checkout proceeds with zero items; an order of \$0.00 is confirmed ("Thank you for your order!").
- **Impact:** Fake/empty orders, polluted order data, confusing for customers, potential fulfilment issues.

BUG-02 — Last Name field overwrites First Name (checkout blocked)

- **Severity:** Critical | **Priority:** High
- **User:** problem_user
- **Steps:**
 1. Log in as **problem_user**, add any item that can be added, open cart → Checkout.
 2. Type First Name = **John**.
 3. Click Last Name, type **Doe**.
 4. Enter Postal Code, click Continue.
- **Expected:** Last Name field contains **Doe**; First Name remains **John**; checkout continues.
- **Actual:** Typed characters in Last Name appear in First Name field (or Last Name stays empty), error "Last Name is required" appears; user can't complete purchase.
- **Impact:** 100% of affected users cannot finish a purchase → direct revenue loss.

- **Evidence:**

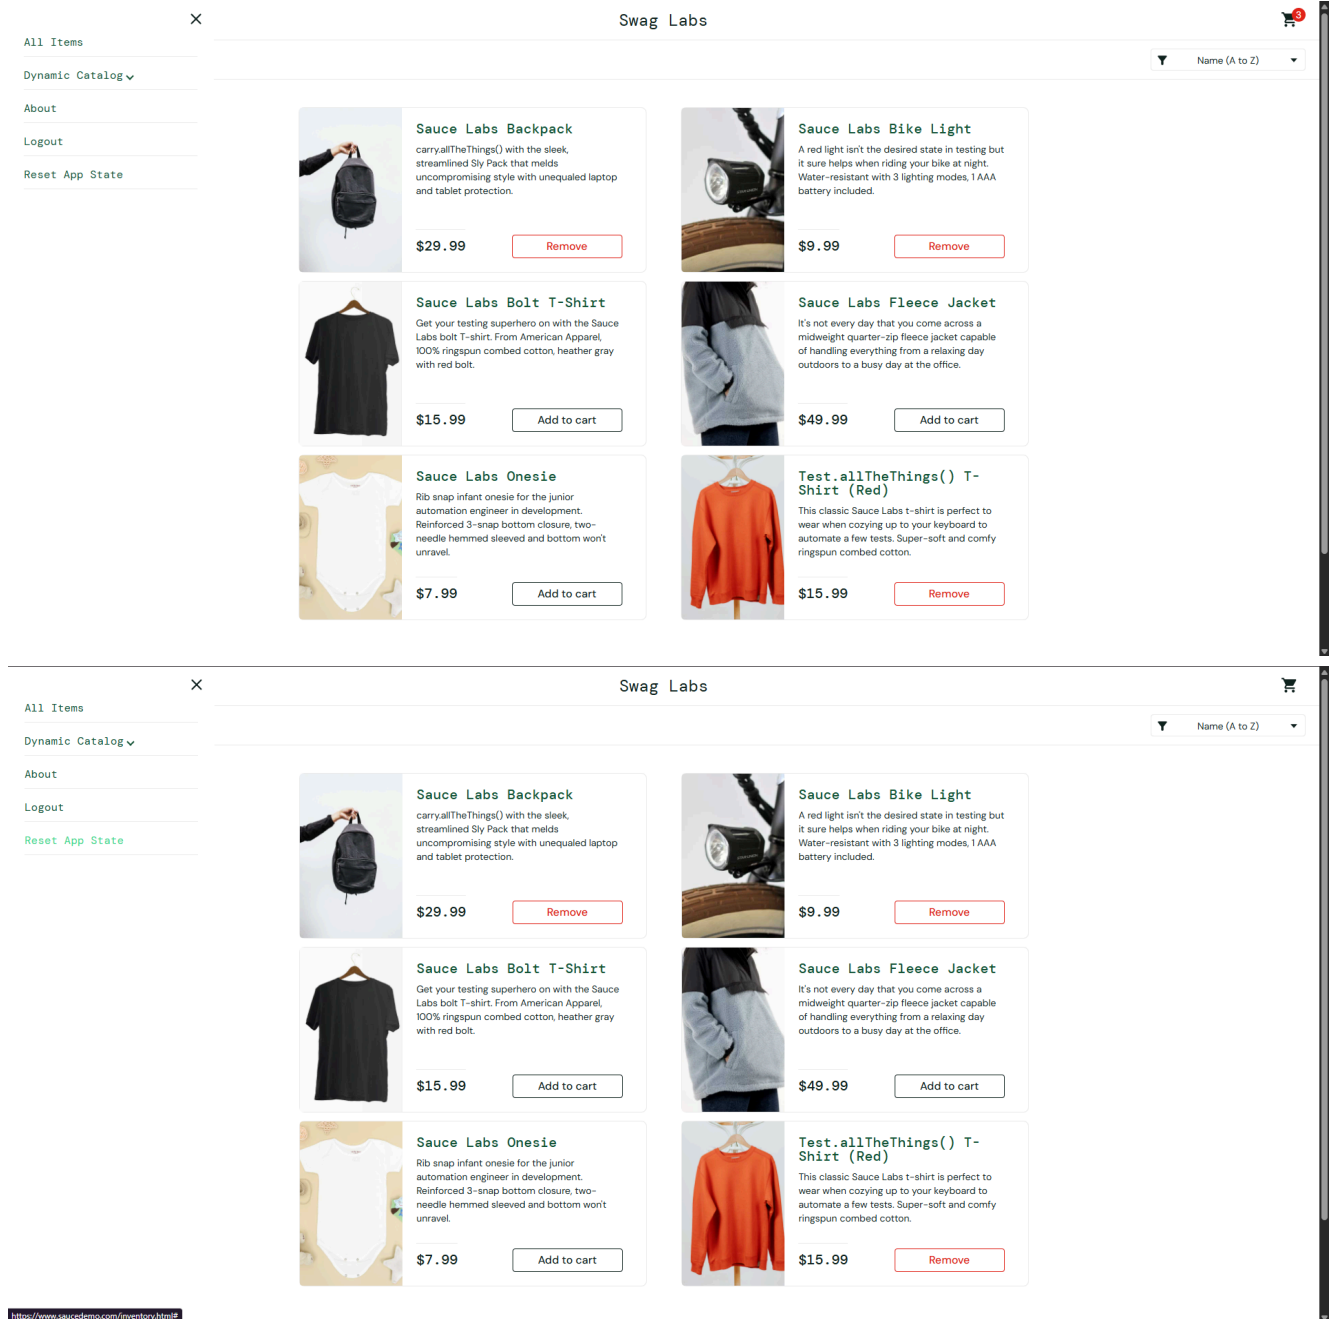

The image displays two screenshots of the Swag Labs checkout page, illustrating a bug. Both screenshots show the 'Checkout: Your Information' screen with a form containing fields for 'First Name' (pre-filled with 'John'), 'Last Name', and 'Zip/Postal Code'. Below the form are 'Cancel' and 'Continue' buttons. A dark green footer bar at the bottom of each screenshot contains social media icons and the text '© 2026 Sauce Labs. All Rights Reserved. Terms of Service | Privacy Policy'.

The top screenshot shows the initial state where the 'Continue' button is highlighted in green. The bottom screenshot shows the state after the 'Reset App State' action, where the 'Continue' button remains highlighted in green, indicating that the button labels have not been reset to their default state.

BUG-03 — "Reset App State" doesn't reset button labels

- **Severity:** Minor | **Priority:** Medium
- **User:** standard_user
- **Steps:**
 1. On inventory page, add 2–3 items (buttons change to "Remove").
 2. Open burger menu → **Reset App State**.
 3. Observe the inventory page without refreshing.
- **Expected:** Cart badge disappears AND all buttons return to "Add to cart".
- **Actual:** Cart badge disappears but buttons still read "Remove" until the page is refreshed. Clicking "Remove" then behaves inconsistently.
- **Impact:** UI state out of sync with real state; user confusion; possible wrong cart count.

• Evidence:

BUG-04 — Weak input validation on checkout form

- **Severity:** Major | **Priority:** Medium
- **User:** standard_user
- **Steps:**
 1. Add item → Cart → Checkout.
 2. First Name = 12345, Last Name = !@#\$%, Postal Code = ABCDE (also try spaces only, and a 200-character string).
 3. Click Continue → Finish.
- **Expected:** Name fields reject digits/symbols/whitespace-only; postal code validated for format; length limit enforced.
- **Actual:** All values accepted and order completes.

- **Impact:** Bad customer data → failed deliveries, fraud risk, data quality problems; very long strings may break layout on overview page.
- **Evidence:**

BUG-05 — Add to cart / Remove buttons unresponsive for specific products

- **Severity:** Critical | **Priority:** High
- **User:** problem_user
- **Steps:**
 1. Log in as **problem_user**.
 2. Click **Add to cart** on each of the 6 products one by one; note which don't change.
 3. For items that did add, try clicking **Remove**.
- **Expected:** Every product can be added and removed.
- **Actual:** Some products can't be added at all; some can be added but can't be removed (commonly reported: Backpack, Bike Light, Onesie can't be removed; Bolt T-Shirt, Fleece Jacket, Red T-Shirt can't be added)
- **Impact:** User can't buy certain products or fix mistakes in cart.
- **Evidence:**

BUG-06 — Cart persists across logout and across users

- **Severity:** Major | **Priority:** Medium
- **User:** standard_user → problem_user
- **Steps:**
 1. Log in as **standard_user**, add 2 items.
 2. Burger menu → Logout.
 3. Log in as a different user (e.g., **problem_user**) in the same browser.
 4. Look at the cart badge and cart page.
- **Expected:** Each user starts with their own (empty) cart; or at minimum, consistent documented behavior.
- **Actual:** previous user's items still appear (cart is stored in browser localStorage, not per account).
- **Impact:** On shared/public computers, another person sees (and can buy) the previous user's cart; privacy and session-isolation problem.

Bug Report - Swag LabsPage 7

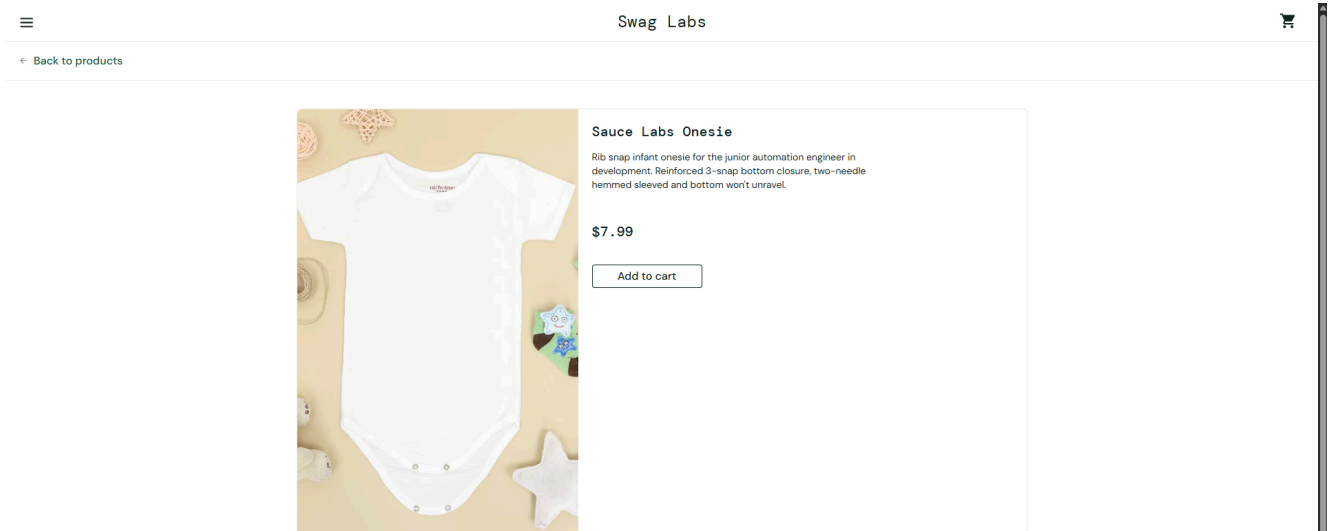

BUG-07 — Product images / detail pages mismatch (problem_user)

- **Severity:** Major | **Priority:** Medium
- **Steps:** Log in as `problem_user`. Observe inventory images. Click several product names/images.
- **Expected:** Each image matches its product; detail page shows the clicked product.
- **Actual:** Every product shows the same dog image; clicking some products opens a *different* product's page.
- **Impact:** Users can't judge what they're buying → wrong purchases, returns.
- **Evidence:**

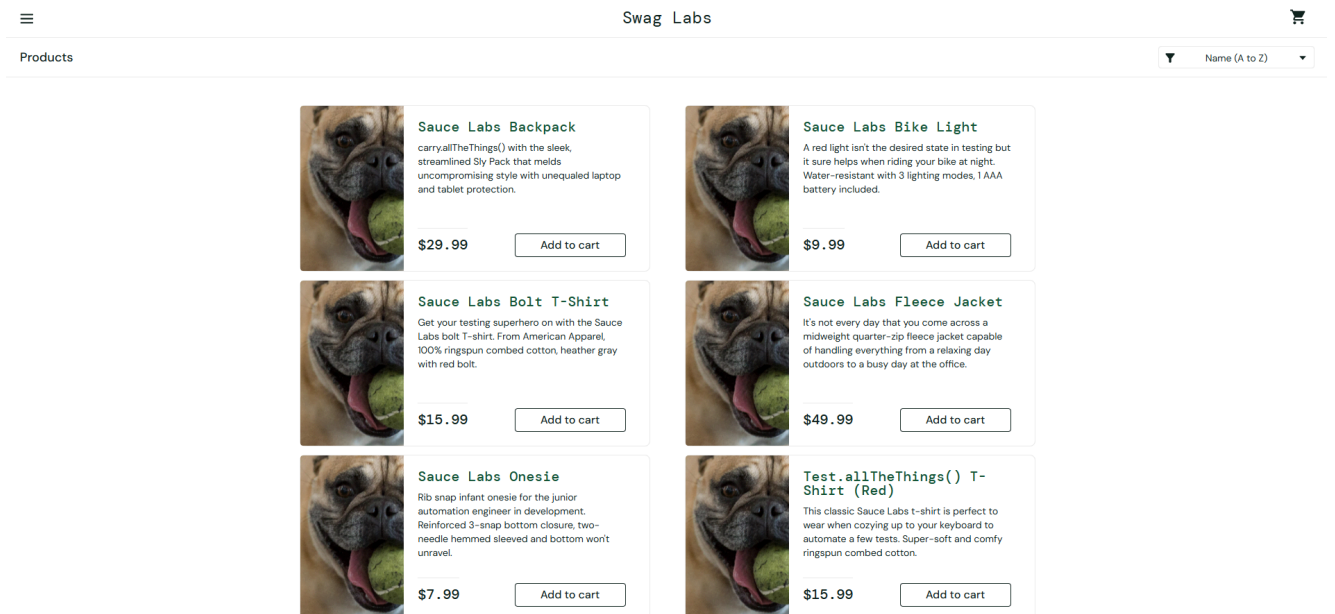

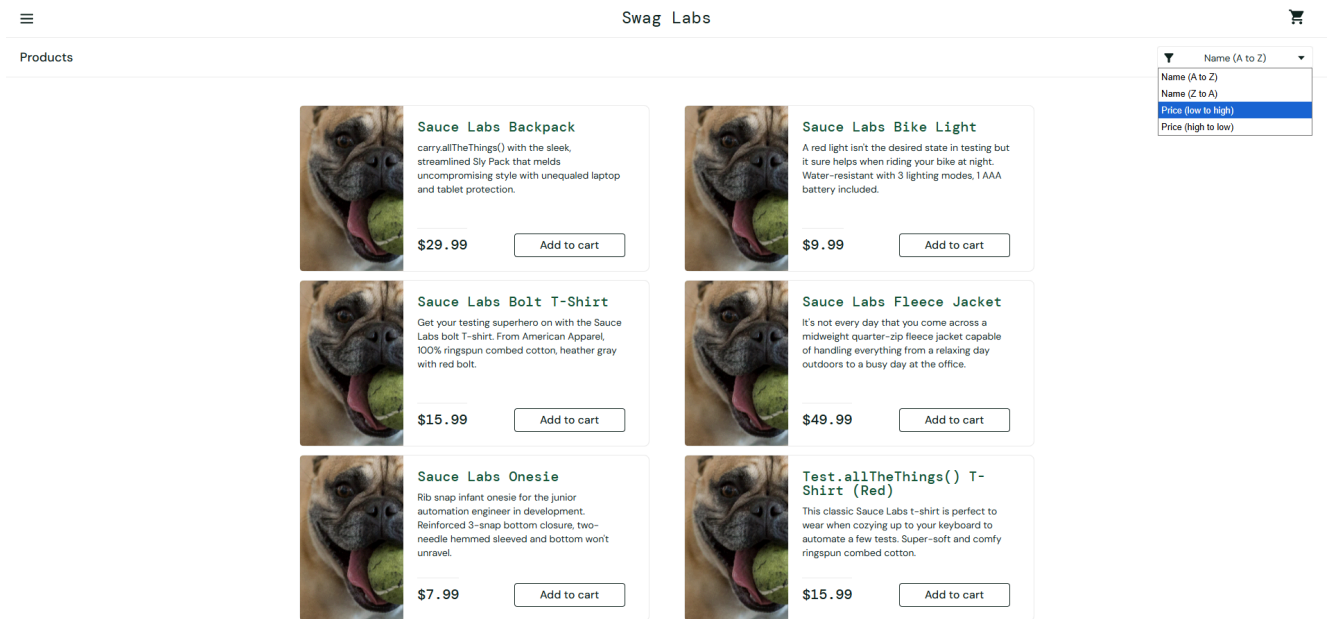

<https://www.saucedemo.com/inventory.html#>

BUG-08 — Sorting has no effect (problem_user)

- **Severity:** Major | **Priority:** Medium
- **Steps:** Log in as **problem_user** → choose each sort option (A–Z, Z–A, Low–High, High–Low).
- **Expected:** List reorders accordingly.
- **Actual:** Order doesn't change (or changes incorrectly).
- **Impact:** Users can't find cheapest/specific items.

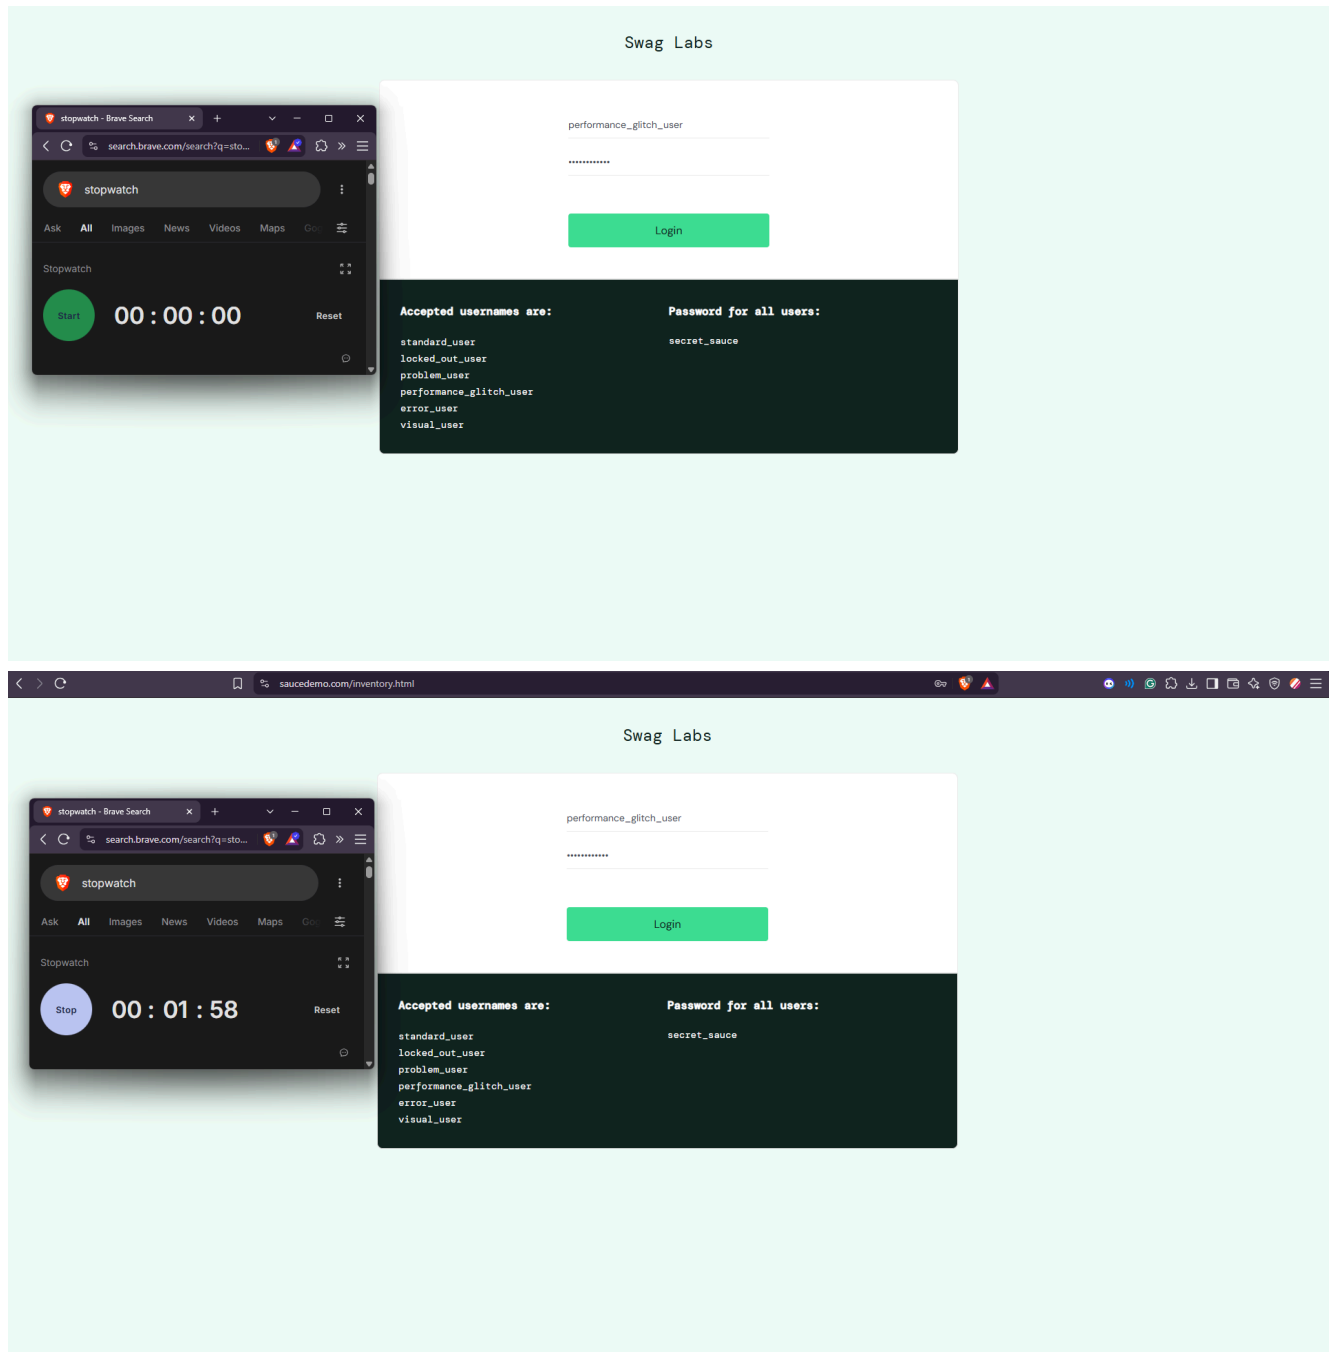

- **Evidence:**

BUG-09 — No loading feedback on slow login (performance_glitch_user)

- **Severity:** Minor | **Priority:** Low
- **Steps:** Start a stopwatch → log in as **performance_glitch_user** → stop when inventory loads; repeat with **standard_user**.
- **Expected:** Quick login or a loading indicator/disabled button while waiting.
- **Actual:** Page appears frozen for several seconds with no spinner; user may click Login repeatedly.
- **Impact:** Perceived failure, abandoned logins, duplicate requests.

- **Evidence:**

BUG-10 — Invalid product ID shows broken page

- **Severity:** Minor | **Priority:** Low
- **Steps:** Logged in, open <https://www.saucedemo.com/inventory-item.html?id=999> (also ?id=-1, ?id=abc).
- **Expected:** Friendly "Product not found" message with link back to products.
- **Actual:** page with empty/undefined product data or "Item not found" with awkward layout.
- **Impact:** Poor handling of bad links/URL tampering.

- Evidence:
